Introduction

woods furniture

We create furniture that inspires and enables students to reach their full learning potential, and contributes to a better future for them and our planet.

Flexible Learning Solutions

Project and team work, social learning and collaborative behaviour need the high flexibility that only Woods designs can offer.

Ergo-Dynamic solutions and learning environments that encourage engagement of the students and support the process of learning and social integration.

Flexible

Flexible furniture such as desks and Storage Porters™ on castors allow for the interior space of the room to be changed around to suit various activities.

Adaptable

Adaptable furniture such as Iris Tables™, Byte Tables and Triquetra Pods™ can be used for collaborative learning styles and also as individual desks.

Stimulating

Stimulating learning environments are made easy with Woods colours and imaginative shapes that have been designed by experts to improve the pedagogy.

Woods colours, product designs and expertise in creating successful learning environments bring education to life.

Iris Table

Configurations

10 Year Warranty

By observing all relevant Australian and international standards in the design of its furniture, Woods is able to ensure both quality and practicality are met. With a large range of products tested and approved by AFRDI, Woods can confidently guarantee their furniture for 10 years.

Big Book Buddy

Configurations

EnviroRecycle

The Woods commitment to a more sustainable world for future generations. Now perhaps more than ever before in human history, we need to be acutely aware of our 'footprint' on the earth.

Our commitment

Woods is committed to reducing the impact of the industry on the environment and all the company's products are developed with this key criteria in mind.

Our goal is to reduce our manufacturing footprint through:

- Adopting waste emission minimisation, resource conservation, recycling and sustainable development through the manufacturing process and selection of raw material.
- All statutory and company regulations are to be strictly observed.
- All employees are aware of the environmental implications of their actions.
- Continual monitoring and updating of appropriate technology in relation to environmental management.
- All parts used in the manufacture of this furniture can be disassembled and used in the recycling process.

Installation of 100kW Solar Panel System

Woods has installed a 100kW solar panel system that contributes to approximately one third of the production facilities daily power requirements, as well as exporting excess power back into the grid on weekends and days when production is not operating.

Selection of Timber Material

Woods works with its major supplier of timber products to ensure that Australian made MDF comes from government and privately owned plantations.

The wood content used in the MDF is 60% pre-consumer recycled and 40% reclaimed silviculture fibre.

Woods uses Australian made MDF to ensure that it complies with low formaldehyde emission level E1 defined in the Australian Standard AS/NZS 1859.2:2004 for MDF.

This means that the emissions are well below the workplace exposure limit set by the National Occupational Health and Safety Commission and also comply with the voluntary Standards of Good Environmental Choice Australia.

Powder-coating of Steel

Woods powder-coating of steel frames is run as an 'in-house' process ensuring that the highest environmental Standards are maintained.

The powder-coating plant is regularly independently tested for compliance to EPA regulations for discharge into the water cycle.

Woods harvests water from its production facility to reduce the impact on domestic water resources.

The powder used in the powder-coating process is TGIC free.

Recyclable Steel

At the end of the product life-span, all steel parts used in the manufacturing process can be separated and sent for recycling.

Accreditation

Woods furniture has been designed and built to the highest standards since 1953, and we are proud of the accreditations our products have achieved.

WDS-2009
GECA 28-2006
Furniture & Fittings

Good Environmental Choice Australia

When a product is certified against Good Environmental Choice Australia (GECA)'s Furniture standards, consumers can be sure that the product has been assessed to meet environmental, human health and ethical impact criteria. GECA certification removes doubt and confusion and makes identifying environmentally and socially preferable products easier.

These Woods' products have achieved GECA accreditation:

4 Point Student Chair	Locker a4, a6, a8
Book Buddies	Locker b2, b3, b4
Bookcase bc2, bc3, bc4	Locker c6, c9, c12

Australasian Furnishing Research & Development Institute

The Australasian Furnishing Research & Development Institute (AFRDI) is an independent not-for-profit technical organisation, serving buyers and sellers in Australia and in New Zealand, operating a system of quality certification for furniture components and related manufactured products and materials through its Blue Tick Product Certification Scheme.

The Blue Tick Certification Scheme certifies products which meet certain standards to AFRDI's satisfaction. The assessment of the products is based on the results of performance, function and safety tests, coupled with an evaluation of the quality and finish of a representative sample of product provided by the supplier.

These Woods' products have achieved AFRDI accreditation:

Triquetra Table	DuraPos Drafting Chair
Byte Table	Panto Move 3D Senior
Conundrum Table	Panto Move 3D Junior
Wave Table 1200 x 600mm	Panto Drafting Stool

Chiropractors' Association of Australia

The Chiropractors' Association of Australia (National) Limited (CAA) is the peak body representing chiropractors.

An underlying principle of chiropractic is "healthy spine, healthier life". By offering expert drug-free spinal health care and lifestyle advice, chiropractors help Australians lead and maintain healthy lives.

With over 2,600 members, the CAA is the largest chiropractic health body in Australia, and coordinates its efforts with its 8 autonomous CAA state & territory organisations.

These Woods' products have achieved CAA accreditation:
