Storage

Personal Lockable Storage

Woods' PLS series is specifically designed and manufactured to the highest standards to ensure the safeguarding of personal belongings. These high quality Australian made lockers will ensure peace of mind that valuable items are safe and secure.

Woods Furniture created and designed the innovative Woods Security Locker in the late 1980's. Today, Woods continues to lead the way with the evolution of personal lockable storage with the PLS Series.

The strength and durability of the locker design, has seen this product in continuous use for over 25 years in the most testing of environments. The introduction of EO Decorwood has added further to the practicality and aesthetics of the product.

Frames

The locker frames are manufactured from heavy duty steel. These frames give the unit their amazing rigidity.

Carcass

The locker carcass is manufactured from 16mm EO laminated MDF and is available in 4 practical colours. The laminated carcass and doors with sealed edges are moisture resistant and easy to clean. Lockers sit on a 98% wood/plastic recycled composite base.

Doors and Hinges

The ultra tough doors and unique Woods hinge system give these lockers their superior security and longevity of use. 18mm EO doors are so much tougher than metal and plastic doors. The doors are available in a range of vibrant and practical colours.

Optional Features:

Sloping Hood Option

To prevent unwanted items being placed on top of the units, we provide the option of fitted sloping hoods. The finish of the hoods will match the carcass.

Identification Plaques

Our numbering system offers a wide variety of colour coded plaques to complement the door and frame colours. Our system assists with clear identification with numbers engraved into plaques that will stand the test of time. Plaque numbering can be customised to fit a school's requirements.

Configurations

With 3 door sizes and a number of locker bank configurations, you are able to maximise space while meeting your students' storage needs.

Door Layout

While the most common locker bank consists of 1 door finish, Woods offers the option of multiple door colours to create a visually impressive display.

Ultimate Security

Our locally designed and manufactured heavy duty cam lock has been specifically created for use in the education market to give you peace of mind that valuable items can be stored safely and securely. The design also allows for schools to supply their own padlocks or combination locks as required.

The Woods brand is synonymous with strength and longevity. The units are Australian made and with their durable design, will provide many years of trouble free use. We stand by every product that carries the Woods name.

PLS A Series

Full height lockers, available in 4 door or 6 door configuration.

Features
Optional Hood

Dimensions
Door size: 870mm (h) x 327mm (w)
